In re Application of: Bomar Jr. et al.

Examination of Application #10/046,846

1. Claims 55-82 of application 10/046,846, filed on 14-January-2002, are presented for examination. This application is CON of 09/243,202, filed on 2-February-1999, now U.S. Patent No. 6,381,561, which is a CIP of 09/018,632, filed on 4-February-1998, now U.S. Patent No. 6,470,303.

Double Patenting Rejections

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321[®] may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b). Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

In re Application of: Bomar Jr. et al.

3. Claims 55-82 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-38 of U.S. Patent No. 6,381,561. Although the conflicting claims are not identical, they are not patentably distinct from each other because the present invention and the patent are each directed to a computer program product operable to receive input information regarding damaged vehicle components for at least one vehicle, categorize damage zones with respect to the location of the bumper of a vehicle, categorize a vehicle component with respect to its location on the vehicle, and estimate the change in the vehicle's velocity as a result of a collision based on the damaged vehicle components information.
